```
# Python While Loop
# Last Updated :
# 3 Jun, 2026
# While Loop is used to execute a block of statements repeatedly until a given condition is satis

# Here, the condition for while will be True as long as the counter variable (count) is less thar

count = 0
while count < 3:
    count = count + 1
    print("Hello Geek")
```

```
Hello Geek
Hello Geek
Hello Geek
```

```
# Infinite while Loop
# An infinite loop is a loop that keeps running continuously because its condition always remains

age = 28
while age < 19:
  print('Infinite Loop')
```

```
# Using with continue statement
# Continue statement is used to skip the current iteration of the loop and move directly to the r

i = 0
a = 'geeksforgeeks'

while i < len(a):
    if a[i] == 'e' or a[i] == 's':
        i += 1
        continue
    print(a[i])
    i += 1
```

```
